Should a 10W solar panel be connected to a 12V battery?

Can You charge a 100Ah battery with a 10W panel?

So if you're planning on charging a 100Ah battery with a 10W panel, then you should use a solar charge controller. This applies to batteries under 100Ah as well. You could connect a 10W panel directly to a 12V water pump or fan, but then it would shut off as soon as it wasn't getting enough power.

Can a 10W panel charge a 12V battery?

A 21.6V VOC rating is also pretty standard for a 12V panel. Newpowa ships their 10W panel with no connectors, but bare wires, which is great if you're going to use it to charge a 12V battery, but also if you plan on wiring it straight to a 12V accessory. Bare wires also make it easy to install whatever connectors you would like.

This can be achieved if the nominal voltage of the panel is lower than 17-18V, and if the solar panel is a lot smaller than the charging battery e.g.. a 10W panel charging a 100Ah battery.
