

32A battery 24v inverter

The MultiPlus-II combines the functions of the MultiPlus and the MultiGrid. It has all the features of the MultiPlus, plus an external current transformer option to implement PowerControl and PowerAssist and to optimize self-consumption with external current sensing (max. 32A). It also has all the features of the MultiGrid with built-in anti-islanding and an increasingly [...]

Note that the inverter/charger uses 24V to control the autotransformer relay. It is important to note that this voltage is consistently 24V across all inverter/charger models, regardless of whether their rated voltage is 12, 24, or 48V. 2.5. Temperature Protected. In case of overheating, the autotransformer is disconnected from the supply.

The MultiPlus-II will prevent overload of a limited AC source, such as a generator or shore power connection. First, battery charging will automatically be reduced when otherwise an overload would occur. The second level will boost the output of a generator or shore side supply with power taken from the battery.
