What are some common uses of 21700 batteries?

21700 battery is one of the most popular and commonly found cells in the battery pack in electric vehicles, battery-powered construction equipment, portable power cutting/drilling tools, the emergency torch, flashlight, etc. after 18650 battery cells.

What is the difference between a 21700 and 18650 battery?

The most significant difference between the 21700 and 18650 batteries is their size and capacity. The 21700 is larger (21mm x 70mm) compared to the 18650 (18mm x 65mm), and this size difference allows the 21700 to store more energy. Capacity: The 21700 typically holds 5000mAh or more, while the 18650 generally maxes out around 3500mAh.

What is a 21700 battery?

The name "21700" refers to its physical dimensions: it has a 21mm diameter and 70mm length. This makes it larger than the popular 18650 battery, which measures 18mm x 65mm. While the 21700 may seem just slightly bigger, its larger size provides substantial benefits in terms of energy storage, power output, and overall performance.

Why is the 21700 lithium battery a good choice?

The 21700 lithium cell is a good choice because it offers longer run time, high output current, and a high energy capacity. Its safety properties also make it popular among tech industries, providing a replacement option for corded tools in various applications.

What is the difference between a 21700 and a 5000 mAh battery?

This larger size allows for greater energy storage capacity compared to smaller batteries, making it an attractive option for various applications. The capacity of 21700 batteries typically ranges from 3000mAh to 5000mAh, providing longer runtimes for devices that demand high power.

What is the difference between AA & 18650 batteries?

The 21700 battery type is not a replacement for AA, AAA, or 18650 size cells. It is larger in both height and diameter compared to these types. 21700 batteries are popular for their higher capabilities, such as over 1000 charge cycles and higher energy density, making them suitable for rechargeable and high current draining devices.
