

# Are there any universal inverters for 60v and 72v

Which inverter do I need for a 12V system?

To connect an inverter to your battery bank, match the battery bank voltage with an inverter that can handle that same voltage. For a 12V system, you need a 12V inverter. Standard Pure Sine Wave inverters simply change DC power to AC power.

Should I buy a 12V or 24V inverter?

So when it comes to buying an inverter you will decide on either a 12v (for small loads) or 24v (medium to large loads). It will most likely have a modified sine wave output, with 220v PD. If you've never used a multimeter before then I wouldn't recommend you play around with electricity without someone with a bit of experience.

Do I need a 60Hz inverter?

Here in the US, things run at 60Hz, in Europe and most other places around the world, things run at 50Hz. You'll most likely require a 60Hz inverter if you are running a device intended to run on US power. We like to go camping and travel quite frequently.

Since i had the breaker off while diagnosing the LED signal problem, it went nowhere, and blinked twice. When I switched on the breaker, it &quot;popped&quot; and reset the breaker. I opened the controller once again, and found black coloring around the KSI red wire input - This is the 60V (now 72V) input from the key switch - blackened on both boards.

For my current transition plan, using my existing 52 volt pack (14s8P, so if I go with 60v, then I can rebuild the pack later with 16s7P, which should fit perfectly) and a smaller pack in series (to get to 60 or 72 volts), I'm wondering if the 72v Satiator has the range to charge the smaller pack (60v version looks like it goes lower).
