Without light, and LCD screen might as well be a paperweight. Many LCD screens use a cold-cathode fluorescent lamp that requires an inverter. Commonly known as a CCFL inverter, this component prepares the power connection of the DC power supply to work with the AC power requirements of the lamp.

The inverter is typically equal to either 120 volts or 240 volts depending on the country. Without a solar inverter in your system, you would be unable to power your home safely using the energy you generate via your solar panels. Solar inverters convert solar panel DC electricity to AC electricity for use or feed back to the grid.

Solar systems also use inverters. Inverters convert the DC current generated by the System to AC current - the type of power most appliances and electronic equipment use. Grid-integrated ...
