

Buy a small solar water pump

What is a solar powered water pump?

Solar powered water pumps are efficient water pump systems that are powered by the energy collected by solar panels. As the solar panels come in contact with the sun's rays, the solar system will collect that energy and convert it into a form that the water pump can use to operate.

What is a solar water pump kit?

The Solariver Solar Water Pump Kit is perfect for large fountains, ponds, waterfalls and rainwater collection. Its solar panel comes with a stake and can be placed anywhere due to using the 16 feet long chord or even an additional 16' extension if needed.

Are solar-powered water pumps a sustainable solution?

Solar-powered water pumps are increasingly popular as a sustainable and cost-effective solution for well, irrigation, and livestock water needs. Solar pumps come in various sizes and types, from small 12V pumps for low gallons per minute requirements to larger systems running off 6-panel solar arrays for commercial agriculture.

Where can I buy a small solar pump for water fountain?
