

Container emergency power generation equipment in Zurich Switzerland

Where is GE Building a temporary reserve power plant?

GE has completed building a 250-megawatt (MW) temporary reserve power plant at GE's Manufacturing Center in Birr, Switzerland, for the Swiss Federal Office of Energy (SFOE). GE's trailer-mounted TM2500 aeroderivative gas turbines will help meet power demand for the country.

Does Switzerland have a hydropower reserve?

Along with the gas power reserve, it recently established a hydropower reserve. According to the Expert Group for Security of Supply at the Swiss Federal Institute of Technology in Zurich, Switzerland imported 131 TWh of energy via fossil fuels in 2020, roughly half of its primary energy demand.

How has Switzerland rescued a power company?

Acting on a financial aid package passed in June, the government has so far rescued at least one power company. It granted Axpo Group, Switzerland's largest producer of renewable energy, a \$4 billion credit line to cover the collateral requirements of long-term power supply contracts.

Is nuclear power a reliable power source in Switzerland?

Nuclear energy also contributed a hefty 18.5% share of generated power in 2021, though that is much lower than the 28.9% of nuclear's share in the country's capacity mix. Nuclear's future as a reliable power source has dimmed because Swiss voters in 2017 voted to phase out nuclear power.
