

EVE Home Energy Storage

How long does Eve battery last?

Equipped with EVE's safe and reliable lithium iron phosphate battery, the maximum cycle life can reach 12,000 times. Provide full-scenario energy storage products covering power storage, communication energy storage, household energy storage and ship power energy storage covering the power generation side, grid side and user side.

Why should you choose Eve energy storage?

Contribute to carbon neutrality and build a green future together EVE Energy Storage has been committed to providing high-security, multi-scenario, and all-round customized ESS solutions for the world.

Who is EVE Energy?

EVE Energy's First Regional Headquarters Officially Unveils! To be the most creative lithium battery leading company and continuously overcome the core technical issues.

Who uses EV charging system?

For many years, it has been used by China Mobile, China Tower and overseas telecom operators. Provide a long-life residential on- and off-grid system, allowing clean energy to help families to use green energy. Solve the problem of imbalance between distributed renewable energy power generation and to fact EV charging.

Why should you choose Eve?

Improve the stability and utilization of the renewable energy generation, and realize "self generation and consumption" on user-end. *Above data comes from EVE's laboratory. Product performance may differ in different products, please contact us for details. EVE provides you with a comprehensive solution for lithium batteries.

What is intelligent distributed energy storage system?

"Intelligent Distributed Energy Storage System" is part of smart grid and it is available to support critical load, improve power quality and increase grid flexibility. Product solutions cover the application of on power generation, power transmission, and user-end applications. Long-cycle energy storage battery, which reduces the system OPEX.

EVE 61.44kWh 614.4V Home Energy Storage System 100Ah Home Wall Mounted High Capacity Energy Storage

"Intelligent Distributed Energy Storage System" is part of smart grid and it is available to support critical load, improve power quality and increase grid flexibility. Full Scenarios Product solutions cover the application of on power generation, power transmission, and user-end applications.

Image: EVE Energy. Tier-1 battery manufacturer EVE Energy will be the first to mass-produce lithium iron phosphate (LFP) battery cells with more than 600Ah capacity for stationary applications. The cells are part of EVE Energy's Mr Flagship series of products and solutions for battery energy storage system (BESS) applications.

In 2024, EVE Energy to expand the energy storage market footsteps accelerated. It not only wins big orders overseas, but also actively expands battery projects at home. On September 9, EVE Energy announced that it would issue convertible corporate bonds to unspecified parties (revised), and the total amount of this convertible bond coissue is ...

EVE Energy's Big Battery Technology: Simplifying GWh-Scale Storage. EVE Energy has pioneered big battery solutions to address industry challenges s 628 Ah ultra-large-capacity "Mr. Big" cell reduces data collection points by 50% for same-scale power stations, significantly cutting operational costs.Key benefits include: 30% reduction in lifecycle ...

EVE's booth at RE+ 2023. Credit: EVE Energy. "We think this is the first battery cell which is designed from the end users" point of view, based on how they want to use it," EVE Energy's head of energy storage Steven Chen says.. The Tier 1 battery manufacturer - ranked as China's third biggest in the stationary energy storage space within the last couple of years - is ...

China's EVE Energy has announced the official launch of the first phase of its 60 GWh battery energy storage factory in Jingmen City, Hubei Province. The facility unveiled on December 10 is considered the world's largest BESS manufacturing plant. ... EVE Energy's large-capacity cells promise to reduce system costs, improve integration ...

EVE Energy Attends the SNEC ES+ 2024 Exhibition with Full-scenario Energy Storage Products and Solutions Sep 28,2024 EVE Energy's US Regional Headquarters Officially Inaugurated

Product Introduction Global Top2 Energy Storage Battery Shipments in 2024 Entered into cooperation with global well-known enterprises to build a new platform for energy ...

EVE Home Energy Storage

From March 23 to 26, 2025, the 15th China International Energy Storage Conference and Exhibition (CIES2025) was held in Hangzhou. EVE Energy showcased its full-scenario energy storage solutions, contributing to the high-quality growth of the energy storage industry.

The 5MWh energy storage system Mr.Giant integrated with Mr.Big, a 628Ah ultra-large capacity battery cell, breaks through the boundary of traditional energy storage technologies and provides customers with better services and value experience with the major advantages of being more efficient, simple, and safe, so as to easily meet the demand ...

Build an energy storage lithium battery platform to help achieve carbon neutrality. Full-scene thermal simulation and verification; Using EVE's safe and reliable LFP batteries; Cell/module ...

The announcement did not name the customer, with whom Eve Energy said it had a long-term supply relationship for the supply of batteries. Eve Energy is Tesla's sixth battery supplier, after the US electric vehicle (EV) maker has struck supply deals with Panasonic, LG Energy Solution, CATL, BYD (HKG: 1211, OTCMKTS: BYDDY) and Sunwoda, according to ...

Established in 2001, EVE Energy Co., Ltd. (hereinafter referred to as EVE) was first listed on Shenzhen GEM in 2009. After 23 years of rapid development, EVE is now a global lithium battery company which possesses core technologies and solutions for consumer batteries, power batteries and energy storage batteries. (Stock code: 300014)

With integrated products such as 1500V liquid cooling system for utility ESS, 48V battery system for telecom ESS, 48V low-voltage and 600V high-voltage battery system for household ESS, ...

EVE Launches New Generation LF560K Energy Storage Battery. The LF560K battery adopts CTT (Cell to TWh) technology, an innovative cell technology for TWh level energy storage, which makes system integration extremely simple and enables cost reduction at both the cell and system level, and is expected to start global delivery in the second quarter of 2024.
