What is grid-connected PV inverter topology?

Summary of grid-connected PV inverter topology In the grid-connected PV system, the DC power of the PV array should be converted into the AC power with proper voltage magnitude, frequency and phase to be connected to the utility grid. Under this condition, a DC-to-AC converter which is better known as inverter is required.

The two main part of an on-grid solar power plant is solar panels, on-grid [grid tie] solar inverter. And these PV plants are suitable for areas with low or negotiable power failure. But, during power outage, grid-connected solar power plants are impractical even on the sunniest days of the year.

The inverter in Fig. 32 is a voltage source inverter and it is based on a 110-W series-resonant dc-dc converter with a high-frequency grid-connected inverter [62]. The inverter connected to the grid is modified in such a way that it cannot be operated as a rectifier, seen from the grid side. Adding two additional diodes does this.

(a) For solving problems with dc currents injection to the grid, Line-frequency transformer (LFT) may be located between the grid and the inverter. (b) For HF-link grid-connected ac/ac inverter applications, a high-frequency transformer (HFT) may be implemented (c) HFT is placed in a dc-link PV-module-connected dcdc converter [70].

Before the pv grid connected inverter is connected to the grid for power generation, it needs to take power from the grid, detect the parameters such as voltage, frequency, phase sequence, etc. of the grid power transmission, and then adjust the parameters of its own power generation to be synchronized with the grid electrical parameters.

Types of Inverters. There are several types of inverters that might be installed as part of a solar system. In a large-scale utility plant or mid-scale community solar project, every solar panel might be attached to a single central inverter. String inverters connect a set of panels--a string--to one inverter. That inverter converts the power produced by the entire string to AC.
