All Variable Frequency Drives (VFDs) have to maintain a constant output voltage-to-frequency (V/f) ratio across all speeds for specific reasons. The relationship between phase voltage (V), frequency (f), and motor magnetic flux ( $\Phi$ ) is expressed by the equation:  $V = 4.444 f N \Phi_m$ . Or in terms of V/f:  $V/f = 4.444 \Phi_m$
