

Home mobile generator power station

Is a portable power station a good alternative to a generator?

If you find yourself in need of power and away from a usable source, a portable power station is an inexpensive alternative to a generator. However, not all power stations are created equal.

What is the difference between a generator and a portable power station?

A portable power station is essentially a big rechargeable battery that you carry around. Deplete it, and it's useless until you can recharge. A generator, by definition, is a device that actually converts some type of energy to usable electricity in whatever circuitry you have it connected to.

How do portable power stations work?

Portable power stations have control panels with LED displays and buttons that turn off and on inputs and display usage and remaining power. Most portable power stations are also compatible with Bluetooth and Wi-Fi, allowing you to monitor and control them remotely from a smartphone app.

Are portable power stations suitable for camping?

Almost all compact portable power stations will be suitable for camping, but I rather like the Bluetti Handsfree 2 for this role - mostly because many of them are big, boxy, unwieldy units that take up a fair amount of space.

How do I choose a portable power station?

Output is the other piece of the puzzle here. You'll want to consider what you need to run. If you simply top-up some phones and laptops, the smaller portable power stations that have just one or two AC outlets and a handful of USB-C and USB-A ports should be enough for you.

What are the best portable power stations?

To help you decide, I tested the efficiency, in a variety of scenarios, of the best portable power stations from Jackery, Oupes, EcoFlow, Anker, Goal Zero, Greccell, Bluetti, Dakota Lithium, Lion Energy, Vtoman, and Ugreen. [What to Know Before Purchasing a Portable Power Station](#)

The more watts, the more power a generator can deliver, so consider your home's power needs. Small generators have capacities around 250 watts, while larger ones offer 3,000 watts or more.

Unlike wall chargers or wireless chargers that need to be plugged in, or power banks with limited battery capacity, a good portable power station can keep your devices powered up to 13 hours or more on a fully charged battery. This depends on things like your battery type, capacity, and how many devices you're charging. Take Anker SOLIX F1200 (PowerHouse 757), for example. ...
