

How big is the outdoor power supply

How much power can a Philips Hue outdoor power supply withstand?

The bottom line is that the maximum power is a little more than 70 watts, much more than the 40 watt power supply from Philips Hue should be able to withstand. But with a measuring device I was able to make interesting findings. The outdoor power supply seems to have enough reserves.

How many watts a power station can handle?

This ensures that your power station can handle the demand without overloading. For example, if your devices consume a total of 100 watts continuously and 190 watts at peak, opt for a power station with a maximum output of at least 250 watts to be on the safe side.

What type of outlet does a power station have?

AC Output: This is the standard household outlet type. Most power stations have at least one AC outlet. DC Output: Often used for car accessories or specific devices. USB Ports: For charging phones, tablets, and other small devices. USB-C Ports: Increasingly common for faster charging of compatible devices.

How to choose a power station?

For example, if you plan to use the power station for camping trips or outdoor events, a lightweight and portable option may be the best choice. On the other hand, if you plan to use the power station to charge multiple devices, a power station with multiple AC outlets and USB ports may be more suitable.

How much power does a camping device use?

You can typically find this information on the device itself or in its user manual. Popular camping devices like LED lights, smartphones, and portable fans usually consume between 5-50 watts. In contrast, more power-hungry equipment like laptops, electric grills, and mini-refrigerators can consume up to 150 watts or more.

What wattage does a portable power station need?

For example, if you plan to power a device that requires 1,000 watts, you'll need a portable power station with an output wattage of at least 1,000 watts. Remember: some devices may have a higher startup or surge wattage, which is the extra wattage required when the device is first turned on. AC Output: This is the standard household outlet type.

To supply three Hue Calla, one Hue Impress wall lamp, two Lily spots and one Outdoor LightStrip with enough power, a power supply from Meanwell is now used. This one offers a proud 150 watt of power at 24 Volts, including one or the other reserve.
