

How long is the warranty period for EK photovoltaic inverters

What are the limitations of a solar inverter warranty?

These are the common limitations and exceptions found in solar inverter warranties and their implications for owners: 1. Transferability: Several solar inverters having a warranty period of 25 to 30 years, offer transfer to new homeowners.

How long do inverter warranties last?

Inverter warranties vary by manufacturer and inverter type. String inverters typically come with 10-12 years of warranty coverage, whereas microinverters and power optimizers are often covered for 25 years.

How long does a solar inverter last?

Within this period, the under-performing solar panels will be replaced, or the owner gets compensated for the associated losses. On the other hand, solar inverters are more complex and hence have shorter warranty periods of 5 to 12 years. However, as solar inverters are easily accessible, they can be swapped out when required.

How do I choose the best warranty for solar panel inverters?

It is important to select the best warranty for solar panel inverters for the following reasons: System Reliability: If an inverter malfunctions, the entire solar system produces less energy, and having a warranty provides you assurance if anything goes wrong.

Do solar panels have a warranty?

Both your solar panels and inverters have their own warranties. A product warranty, which covers defects on the solar panels. For that, the industry standard is 5-10 years, with selected manufacturers offering up to 20 years. A power output warranty, which covers cases where the power output falls below the guaranteed levels.

Can a solar inverter warranty be void if I move?

3. Equipment Relocation: If you decide to move your equipment and re-install solar inverters in a new location, there are chances that your warranty might be void if you haven't followed the terms and conditions before relocating. 4.
