

How much does a household energy storage power supply cost in Tallinn

How much does it cost to charge an electric vehicle in Tallinn?

It costs EUR5.23 to charge an electric vehicle in Tallinn. If you are charging an electric vehicle once a day, it will cost you a total of EUR156.9 per month. If you decide to charge your electric vehicle every 2nd day, you would save EUR78.45. *This is based on charging an electric vehicle, and using 45 kWh.

Is Estonia part of Nord Pool's open electricity market?

Estonia is part of Nord Pool's open electricity market together with Norway, Sweden, Finland, Denmark, Latvia and Lithuania (see map). In the open electricity market (power exchange), the price of electricity is formed as a result of supply and demand. There is at least one price area in each country, in a larger country there may be several.

How much does electricity cost per kilowatt-hour?

For example, if the wholesale price of electricity is EUR 43 per megawatt-hour, that would be 4.3 cents per kilowatt-hour in kilowatts. It is worth remembering that the wholesale price of electricity does not include VAT and does not take into account the customer's electricity consumption.

How much does a hairdryer cost in Tallinn?

It costs EUR0.04 to use a hairdryer for 10 minutes in Tallinn. If you are using a hairdryer for 10 minutes once a day, it will cost you a total of EUR1.2 per month. If you decide to use the hairdryer for 5 minutes, you would save EUR0.60.

Where can I find wholesale electricity prices?

Hourly wholesale market prices are published on the Nordic Power Exchange, i.e., on the website of Nord Pool. You can also check the hourly rates for the next day with Enefit's mobile app. On the wholesale market, very large quantities of electricity are traded on, thus, prices are expressed in megawatt hours (1 MWh = 1000 kWh).

How much does it cost to shower in Tallinn?

It costs EUR0.70 to shower for 10 minutes in Tallinn. If you are showering for 10 minutes once a day, it will cost you a total of EUR21 per month. If you decide to reduce showers to 5 minutes, you would save EUR10.50. *This is based on showering for 10 minutes, and using 6 kWh. How much does it cost to have a bath?

Without battery storage, a lot of the energy you generate will go to waste. That's because wind and solar tend to have hour-to-hour variability; you can't switch them on and off whenever you need them. By storing the energy ...
