

# How much does a portable power bank usually cost

How much does a power bank cost?

The models in our power bank reviews range in price from \$15 up to \$170. While you can buy power banks for under \$30, these cheaper models are generally under 3000mAh, so you'll only get one charge out of them at a time (if you're lucky). Plenty of the power banks we recommend are under \$100, so you don't have to spend top dollar to get a good one.

What size power bank do I need?

To determine the size of power bank you need, consider both your power needs and portability requirements. A capacity of around 3,500mAh is usually sufficient to charge a phone once.

Should I buy a small power bank or a large power bank?

Small power banks can be great for an occasional top up of power on the go - they're light enough that you'll hardly feel the weight of them in your bag. Large models give you more juice but are less portable.

Can a power bank charge a device?

A few things need to match up in order for a power bank to charge your device. For starters, the power bank's output needs to meet the requirements of the device you want to charge. Smartphones can charge off a small current, tablets require more, and laptops and handheld consoles require more again.

How many portable power bank Chargers have been tested?

To date, we've tested more than 100 portable power bank chargers. The most popular and relevant models are shown on this page. Our rigorous testing programme involves:

What is a don't buy power bank?

Don't Buy power banks Our tests uncover the best and the worst. If a product performs so poorly that we think you should avoid it, we call it a Don't Buy.
