Inverter 370w 220v

Solar pump inverter obtains direct current energy from photovoltaic cells, and converts it into electric energy to drive the water pump. According to the intensity of sunlight, take use of ...

A 220V, 1 hp pump is about 750w in ideal conditions. In real life, it's going to need about 850W because of internal losses. There is also a large starting surge to account for too. To run this from solar, I would recommend a Xantrex XW6048 inverter. It outputs 240VAC, 60A on each leg. This should be enough to start any home-style well pump.
