Where can I buy an inverter in Australia?

Share contact information, store details, and brand content with your customers. Inverter.com.au is the online inverter store for Australia's best inverters. Suppliers of quality inverter, sine wave inverter, inverter charger, solar inverter and off grid solar systems, power inverter technology for over 20 years.

How many types of solar inverters are there?

There are 5 different kinds of solar inverters, all with varying benefits: A battery inverter is the best option if you are needing to retrospectively fit a battery into your solar system, or are wanting to keep your battery separate from your solar panels and run through a different inverter.

What is a string inverter?

String inverters are the most common inverter option for residential use, and there is usually 1 string inverter per solar installation. They are known as 'string inverters' due to the fact that a string of solar panels is connected to them. The solar inverter is a device that can convert 12V/24V DC power into 220V AC current.

How does a solar inverter work?

A solar inverter works by taking in the variable direct current, or 'DC' output, from your solar panels and transforming it into alternating 120V/240V current, or 'AC' output. The appliances in your home run on AC, not DC, which is why the solar inverter must change the DC output that is collected by your solar panels.

Solar Wholesale has simplified the process of DIY Solar. Solar in a box kits were designed to save you time and money at the hardware store. Every component you need to install solar will be included, from drill bits to chalk line. To ensure ...

K solar 60 kw on-grid solar inverter; Solar inverter trainer kit; Soale solar inverter kit, for home, 1000va

In string inverter systems, solar panels are chained together in series, with the final panel in the chain plugging into an input on the inverter. For example, a kit may be designed with two strings of 8 panels apiece, for a total of 16 panels. String inverters are the most cost-effective option when your system is built in full sunlight.

The Enphase architecture was recently installed by the NHS in Kent, helping them get the most out of a challenging roof layout. Read more about this case study here.. Enphase systems can be designed in easy-PV, a quick way to double check the BOM (Bill of Materials) is by using the Enphase System Builder.
