

# Is there a photovoltaic glass factory in Bosnia and Herzegovina

How much solar energy does Bosnia have?

The average intensity of solar radiation in Bosnia is approximately 1,500 kWh/m<sup>2</sup> annually. 12 The national average for kWh per kWp installed in Bosnia annually typically ranges from 1,400 to 1,600 kWh/kWp. 3 According to the data from December 2023, the average price of electricity for households in Bosnia and Herzegovina is \$0.096 per kWh.

How much does electricity cost in Bosnia and Herzegovina?

According to the data from December 2023, the average price of electricity for households in Bosnia and Herzegovina is \$0.096 per kWh. This includes all components of the electricity bill such as the cost of power, distribution and taxes. For businesses, the average electricity price in Bosnia and Herzegovina is \$0.109 per kWh. 4

How much sunlight does Bosnia get a year?

Bosnia receives approximately 2,100 to 2,500 hours of sunshine per year. The average intensity of solar radiation in Bosnia is approximately 1,500 kWh/m<sup>2</sup> annually. 12 The national average for kWh per kWp installed in Bosnia annually typically ranges from 1,400 to 1,600 kWh/kWp. 3

Arctech announced that it had signed a supply agreement with NORINCO International, part of China North Industries Corporation. Under this agreement, Arctech will supply its signature 1P single-axis solar tracking system SkyLine II for a 125 MW solar project located near Stolac, Bosnia and Herzegovina (BiH), marking a significant milestone for ...

Bosnia and Herzegovina Solar Photovoltaic Glass Market (2024-2030) | Forecast, Segmentation, Size, Companies, Trends, Value, Share, Outlook, Analysis, Industry, Growth & Revenue

Estimation of potential in Bosnia and Herzegovina Electricity consumption in the period from 1946 to 2021 is shown in Figure 4 [26]. In the last few years, the COVID-19 pandemic had a significant impact on electricity consumption in Bosnia and Herzegovina, whereby ...

In general, there is a good potential in Bosnia for the production of electricity from RES, including PV panels. According to data collected from PVGIS yearly PV energy production in Bosnia from 1kWp installed power could be anywhere between 1100 up to 1520 kWh depending on exact location and the observed period of data.
