

Jordan High Power Uninterruptible Power Supply

ABB's ZISC is a high performance, high efficiency power conditioning and uninterruptible power supply architecture. It provides protection from a broad spectrum of utility voltage events and supplies continuous clean power. ZISC architecture is based on an isolating line reactor coupled with the high performance ABB power converters.

The Digital Pure Sine Wave UPS System operates in two modes: Standby Mode - Operational in the presence of AC line voltage; battery is charged in this mode. UPS Mode - Operational during a power outage; the system switches to a function called inverter to provide power to load. Charge stored in the battery is converted to AC output.
