

What is the current power supply for Juba?

3.2.2.2 The current power supply for Juba is from a few generators (7 x 1.38 MW) being operated by SSEC. These will be rehabilitated with JICA support and an additional 5 machines will be installed. The generators will be fitted with gas emission reduction filters.

What is Juba electricity project?

3.2.3.1 The project entails rehabilitation and expansion of reliable and affordable electricity to residents and industries in Juba City. The implementation of the project shall have minimum disturbance to residents as it will utilize the existing route alignment along residential access roads.

How much does electricity cost in Juba?

The rest of the population uses firewood, primary fuel, kerosene or paraffin for cooking or lighting purposes. While households with high income would be willing to pay over US\$1 per kWh, the willingness to pay for electricity is estimated to be around US\$0.8 per kWh in Juba.

Does Bank support Juba PDSRE project?

The proposed Bank support to Juba PDSRE Project is in line with the South Sudan Development Plan and South Sudan Infrastructure Action Plan both identifying infrastructure as a core priority for South Sudan.

How to improve security in Juba?

In order to facilitate the purchase of credit for these pre-paid meters, about 10 automatic electricity vending stations will be installed. As part of the project, street light amounting to 2,250 light points will be installed along the main roads, which will help improving the security situation in Juba. 2.2.

How will Fula Rapids power plant affect Juba City?

In the medium term, the city will be fed with clean hydropower from the Fula Rapids Power Plant (42MW) which will reduce the proportion of thermal power into the Juba power network. 3.2.3.1 The project entails rehabilitation and expansion of reliable and affordable electricity to residents and industries in Juba City.

Second, following the shutdown of Juba power station in 2015, electricity in Juba has either been self-generated or supplied from neighboring households and independent power producers (IPPs). A little over forty-seven percent (47.57%) of the respondents generate their own power and 36.33% get power through the neighborhood mini-grids.

As an emergency measure to rehabilitate the existing network and to absorb the possible supply from the Fula Rapids power, immediate investment is required. This report ...
