What is an on-grid inverter?

The on-grid inverters are also known as grid-tied inverters, which are designed for solar systems that are connected to the utility grid. This means that this group of inverters can convert DC power from solar panels into AC power so that it can be fed directly into the grid or used to power household appliances.

How much does an off-grid solar inverter cost?

The cost for off-grid solar inverters happens to be, in most cases, higher than on-grid inverters, which range from \$500 to \$5000; the reason is because of the additional parts that are essential for off-grid operation. If you want to have access to growatt off grid inverter you can do so by visiting the website and prices. 3.
