

Kyiv Lithium Battery Company

Did European lithium acquire two lithium deposits in Ukraine?

The acquisition of the two lithium deposits in Ukraine is a complex transaction: European Lithium acquired the Ukrainian company Petro Consulting LLC from Millstone. This company has a stake in the two mining projects.

Is TechMet planning a major Lithium Project in Ukraine?

(Image: Adobe Stock |Oleksandr.) Mining investment firm TechMet, which counts the US government as one of its largest investors, is looking to develop a major lithium project in central Ukraine. TechMet chief executive Brian Menell told the Financial Times his company had been evaluating the Dobra project since 2023.

Will European lithium become Europe's largest lithium supplier?

Australian mining company European Lithium is in the process of securing two promising lithium deposits in Ukraine, aiming to become the largest lithium supplier in Europe and an essential part of an integrated European battery supply chain.

What is a lithium ion battery?

Lithium-ion batteries, abbreviated as Li-ion batteries, are a popular type of rechargeable battery found in a wide range of portable electronics and electric vehicles. At their core, these batteries function through the movement of lithium ions between a carbon-based anode, typically graphite, and a cathode made from lithium metal oxide.

Where is European lithium based?

European Lithium is listed on the stock exchanges in Sydney and Frankfurt and is represented in Austria by ECM Lithium AT GmbH. Until the completion of the planned acquisition in Ukraine, the completion of the final feasibility study of the lithium project in Wolfsberg, Austria, now has the highest priority, the group says.

How big is the lithium-ion battery market?

The lithium-ion battery market, valued at \$54.4 billion in 2023, is experiencing rapid growth, with projections indicating a surge to \$182.5 billion by 2030 and further expansion to \$187.1 billion by 2032. This remarkable growth, at a compound annual growth rate (CAGR) of 14.2% to 20.3%, is fueled by several key factors.

Ukraine's subsoil holds an estimated 10 per cent of the world's reserves of lithium, used in battery production, according to government figures. Reserves appear across some 820 sq km, but ...
