How to choose a BMS for lithium batteries?

To build safe-high performance battery packs, you need to know how to choose a BMS for lithium batteries. The primary job of a BMS is to prevent overloading the battery cells. To be effective, the maximum rating on the BMS should be greater than the maximum amperage rating of the battery.

What is a battery management system (BMS)?

One of the most important things in any lithium battery bank is BMS (Battery Management System). BMS monitors the charging and discharging cycle of each cell so that battery cells will not get damaged. Su-vastika Lithium Batteries are available in all voltage range viz 12.8V, 51.2V, 96V, 192V, 384V (can be customised as per customer's need)

Why should you choose a lithium battery bank?

Our Lithium Battery bank is extremely compatible and attractive in comparison of Tubular or lead acid batteries of the same capacity. One of the most important things in any lithium battery bank is BMS (Battery Management System). BMS monitors the charging and discharging cycle of each cell so that battery cells will not get damaged.

What does a BMS prevent in lithium-ion batteries?

A BMS prevents your battery cells from being drained or charged too much. Another important role of the BMS is to provide overcurrent protection to prevent fires. Lithium-ion batteries do not require a BMS to operate, but a lithium-ion battery pack should never be used without a BMS.

How much does a battery management system cost?

Active BMS also enables low-voltage charging restart once cells recover to safe zones. With enhanced capabilities over passive BMS, they suit medium-large battery capacities. Average active BMS price range: \$500-\$2,000. Hybrid BMS - As the name implies, hybrid BMS combines elements of both passive and active systems.

How much does a hybrid battery management system cost?

With almost full capabilities at partial costs, hybrid BMS presents excellent middle-ground options for many lithium battery applications. Average hybrid BMS price range: \$800-\$1,500. Capabilities and pricing can vary widely for BMS. Here are 6 of the leading global manufacturers serving both consumer and industrial lithium battery markets:
