

When will the electricity market open in Lithuania?

The electricity market will be opened for households from January 2021. All these changes and innovations have created a wider electricity supply in Lithuania, and also strengthened the European Union's single electricity market. Elengr provides electricity to both households and businesses.

Why is the Lithuanian gas market open?

De facto Lithuanian market became fully open from 2019 after Parliament abolished the obligation for regulated companies to buy gas from the former monopoly „Lietuvos energija“. This ensures absolutely free competition and allows the consumer to choose the most suitable service provider.

How has Lithuania reformed its energy sector?

In 2009, the EU adopted the Third Energy Package, a package of legislative measures aimed at liberalising EU energy markets. Based on the ownership unbundling requirements of the Third Energy Package, Lithuania has reformed its electricity sector by separating transmission from generation and supply activities.

What does the Lithuanian Energy Agency do?

The Lithuanian Energy Agency is a non-profit public entity, created in 2018, to operate in the fields of energy policy, energy efficiency, and energy resources, as well as the implementation and monitoring of the national energy independence strategy and state programs; it also manages oil products reserves.

How much power will Lithuania have in 2031?

The capacity should increase by 4 GW to 9.3 GW in 2031. More than 1.1 GW of thermal power plants should be decommissioned, including 360 MW at Vilnius-III by 2025 and 600 MW at Elektrenai by 2030. The Lithuania energy market report provides expert analysis of the energy market situation in Lithuania.

Why is Lithuania strengthening its power and gas interconnections?

Lithuania is strengthening its power and gas interconnections with Poland, Sweden, and Latvia. New capacities will be required to offset thermal plant decommissioning and to improve power independence. The Ministry of Energy is responsible for the energy sector.
