

London Power Tools Lithium Battery

What type of battery is used in cordless power tools?

Li-ion batteries are the most common type of battery used in cordless power tools today. Battery technology has advanced significantly in recent years, with lithium-ion replacing the previous generations of nickel-cadmium (NiCad) and nickel metal hydride (NiMH) batteries.

Where can I buy a replacement battery for a power tool?

We have the perfect solution here at UKBATTERY LTD with our high-quality affordable replacement batteries. Buying original cells from the power tool manufacturers such as DeWalt and Makita can account for around half the cost of the tool. When replacing several batteries at the same time, the cost can soon add up.

Do power tools & drill batteries lose their charge?

Over time, power tools & drill batteries lose their charge and may require frequent charging. Do you have to swap your battery several times an hour? Are you constantly having to wait for your battery to get to full power? Could you do with a spare battery in your toolbox just in case?

What is a lithium ion battery?

Li-ion is the most common compound used in today's power tools. With the demands of tradesmen and DIY enthusiasts getting ever greater, lithium-ion batteries have quickly become the go-to choice for people looking for a dependable, cost-effective battery that gives constant power and performance at a great price.

Do Bosch Lithium-Ion cordless tools lose energy?

And there is no loss of energy as the battery charge decreases, rather you have full power right to the end. Energy bundles contained in every Bosch lithium-ion cordless tool. The Bosch lithium-ion batteries impress with their power, weight and low space requirement, are always ready to be used and can be fully or partially charged at any time.

Why are lithium-ion batteries so popular?

With the demands of tradesmen and DIY enthusiasts getting ever greater, lithium-ion batteries have quickly become the go-to choice for people looking for a dependable, cost-effective battery that gives constant power and performance at a great price. Lithium-ion has the increased benefit of being lighter than other compounds used.
