A stationary BESS paired with two DC fast chargers, each at 175 kW, can top up the vehicles during lunch breaks, ensuring a continuous energy supply without interrupting the workflow. With a BESS, a 250A grid connection is sufficient compared to the 500A connection required without a BESS.

Operations running on diesel generators Sometimes used as a backup power source or in remote locations. Switching from noisy and expensive diesel generators to a solar and battery solution can provide the supply power needs but with reduced costs and emissions. Whether a BESS can help you will depend on your specific energy needs and requirements.
