

In the case of Macedonia, energy production is based mainly on the low-quality domestic lignite, biomass and hydro. According to EUROSTAT [19], in the year 2008 the share of lignite in total primary energy consumption was 51%, followed by biomass with 6%, hydro power with 2.3%, and geothermal energy with the share of 0.3%. Furthermore, in the energy balance ...

Turkish renewables company Fortis Energy has contracted Pomega Energy Storage Technologies to install a 62-MW/104-MWh battery at the site of a 80-MWp solar park it operates in North Macedonia. ... It will help enhance the reliability and stability of the power grid by storing excess power from the Oslomej solar park and releasing it during ...

Charting Macedonia's Energy Trajectory in 2024 and beyond. Gjorgjioska M. Adela . Summary. Since assuming office in June 2024, Macedonia's new government, led by Prime Minister Hristijan Mickoski, has introduced a proactive and ambitious energy agenda, announced by the establishment of a new Ministry of Energy, Mining, and Mineral Resources.

N. Macedonia targets 46% of renewables in power mix by 2025. The share of renewable energy sources in North Macedonia's electricity production is expected to reach 46% by 2025, the country's finance ministry said.

The draft Law on Energy, the first new version after five years, stipulates that the status of a strategic project, eligible for state aid, can be declared for high-voltage power lines, energy storage, key equipment and ...

North Macedonia amended the rulebook on renewable energy sources, increasing the maximum capacities of rooftop solar power plants for households, firms and government institutions. Minister of Economy Kreshnik Bekteshi said they will be able to sell surplus electricity.

Bulgaria's Solarpro Holding wins 50 MWp power plant project in N. Macedonia. Bulgarian solar energy equipment supplier Solarpro Holding [BUL:OS8] said on Wednesday it was selected by North Macedonia's government to build a photovoltaic power plant with an installed capacity of up to 50 MWp at the location of an old mine in Oslomej, in the ...

This isn't science fiction - it's exactly what Skopje Bank's energy storage production aims to achieve in North Macedonia. As the world races toward net-zero targets, this Balkan nation is ...

But the energy mix - the balance of sources of energy in the supply - is becoming increasingly important as countries try to shift away from fossil fuels towards low-carbon sources of energy (nuclear or renewables

including hydropower, solar and wind).

Additionally, North Macedonia's recent establishment of the Green Finance Facility (GFF), a EUR30 million initiative aimed at supporting small and medium-sized enterprises (SMEs) and underserved households in renewable energy investments, underscores the commitment to fostering a sustainable energy landscape. This financial support, coupled ...

Minister Sanja Božinovska rekindles initiative for pumped storage hydropower capacities. In a recent interview, North Macedonia's Minister of Energy, Mining and Minerals Sanja Božinovska said projects are under development for battery energy storage systems (BESS) and pumped storage hydropower plants. The aim is to increase grid stability ...

The Draft Law on Energy, which envisages full liberalization of the energy sector, will soon be submitted to the parliament, the Macedonian Government announced. Deputy Prime Minister for Economic Affairs Kočo ...

N. Macedonia to close Bitola, Oslomej coal-fired power plants by ... License: Creative Commons, Attribution-ShareAlike 2.0 Generic. North Macedonia plans to close down coal-fired power plants REK Bitola and TEC Oslomej by 2030 as part of its strategy to switch to renewable energy sources, local media reported.

North Macedonia should transpose the Security of Gas Supply and the Storage Regulations. Improving the environment 50% North Macedonia achieved limited progress in the area of environment. The long-standing non-compliance with the National Emission Reduction Plan ceilings remains unaddressed. Emission abatement measures must be taken ...
