

New UPS uninterruptible power supply is affordable

Do you need an uninterruptible power supply (UPS)?

If you have important electronics that have to keep running when the power's out, you'll need an uninterruptible power supply (UPS). We've reviewed our recommendations and are confident these are still the best UPS devices you can buy. Many smart devices have built-in battery packs, with modern laptops packing enough cells to last a whole day.

What is the best ups?

Read More » Our pick for the best UPS overall goes to the APC BR1500G Backup Battery. At 1500VA/865W, it can power most devices, including computers, external hard drives, and wireless routers, from a few minutes to several hours, depending on the total connected load.

Which ups should I buy?

For larger setups that need extended runtime, the APC BR1500MS2 is the ideal pick. This UPS offers the highest peak power output and the most robust backup duration among our recommendations, making it perfect for high-performance PCs, networking equipment, and other critical devices.

Why should you buy the best ups?

That's where the best UPS come in, as if there's a power cut, they will seamlessly switch to battery power, and your devices will remain on and running until the main power is restored, or you can safely shut down the device. These days many of us are working from home, so buying the best UPS your budget can stretch to is even more important.

Should I buy a ups for my home?

You may find that you're plugging in a lot more power-hungry devices into your home power supply, and this could lead to power cuts or power surges. Your home likely won't have the power backup solutions that your office does, so buying a UPS for your home could be a very wise investment.

What is a 3 year warranty on a ups?

A 3 year warranty is standard, and this warranty period corresponds to the battery life expectations for your standard UPS battery. What is a UPS? The acronym UPS stands for Uninterruptible Power Supply.
