

Norway dedicated outdoor power supply

Does Norway have hydropower?

Hydropower accounts for most of the Norwegian power supply, and the resource base for production depends on the precipitation in a given year. This is a significant difference compared to the rest of Europe where security of supply is mainly secured through thermal power plants, with fuels available in the energy markets.

Where are electricity production resources located in Norway?

Electricity production resources are often located far from where consumption takes place. A well-developed electricity grid makes it possible to transmit power from the hydropower plants in the southwest and north to consumers in other parts of Norway and abroad.

How does the electricity grid work in Norway?

The electricity grid enables electricity transport from producers to consumers, and connects Norway's power system to other countries' systems. The three fundamental functions of the power supply system are: A reliable supply of electricity is crucial in modern society.

How does Norwegian power supply differ from other European countries?

Hydropower accounts for most of the Norwegian power supplies, and the resource base for production depends on the precipitation in a given year. This is a significant difference for the rest of Europe where security of supply is mainly secured through thermal power plants, with fuels available in the energy markets.

Does Norway have a good power system?

Production capacity is therefore unequally distributed between different regions of Norway. A well-developed power grid is vital for transmitting electricity to consumers in all parts of the country. The Norwegian power system is closely integrated with the other Nordic systems, both in physical terms and through market integration.

Who is the Norwegian Energy Directorate?

It is headed by the Norwegian Water Resources and Energy Directorate and also includes representatives of Statnett, grid companies, major electricity producers and larger district heating companies, and regional representatives of the power supply sector.
