How much space does a photovoltaic module occupy?

Photovoltaic modules installed on a sloping roof or facade occupy an area of approximately 8 m<sup>2</sup>/kWp. Photovoltaic modules installed on the ground or on a flat surface occupy an area of approximately 20 m<sup>2</sup>/kWp,avoiding shading between the rows of modules.

o Off-grid PV Power System Design Guidelines o Off-grid PV Power System Installation Guidelines Those two guidelines describe how to design and install: 1. Systems that provide dc loads only as seen in Figure 1. 2. Systems that include one or more inverters providing ac power to all loads can be provided as either: a.
