Where should solar panels be installed in Ottawa?

For optimal performance,it's best to install solar panels on a south-facing surface. This surface should also be free from any shade. This approach is ideal for homes in Ottawa. Here is a table showing the estimated cost of a residential solar system by the system's size:

How long does it take to install solar panels in Ottawa?

Installing a solar energy system typically takes 1 to 3 days,depending on the project's size and complexity. Our solar company in Ottawa ensures a smooth and efficient installation process with minimal disruption to your daily routine. What kind of maintenance is required for solar panels? Solar panels require minimal maintenance.

How much electricity does a 5kw solar panel produce in Ottawa?

In Ottawa,a standard 5kW solar panel setup can produce more than 5000 kWh each year. The average household uses about 8000 kWh of electricity annually. This can lead to savings of roughly \$1000 every year. For optimal performance,it's best to install solar panels on a south-facing surface. This surface should also be free from any shade.

The best angle or so called inclination/slope of the solar panels depends on the Latitude your location. The closer you are to the Equator, the lower is the angle. For each location, we have the optimal angle for the setups that can choose it. If you are going to mount the solar panels on your roof, we generated a few reports with different angles.
