

Philippine Cebu Energy Storage Project Cooperation Company

What are the benefits of energy storage systems in the Philippines?

Configuring an energy storage system can alleviate grid congestion and improve grid stability. Smoother Energy Output: As of now, the Philippine power grid coverage rate is about 91%, and some areas still have problems with no power coverage, insufficient power supply, and unstable power.

How can CREC help the Philippines?

“We are happy to support CREC in its goals to advance energy storage systems in the Philippines, and through our technology, we will be able to help CREC and the Philippines with its power needs,” stated Sungrow VP of PV&ESS Shawn Shi.

How is Bess transforming the Philippine energy industry?

With the commercial operations of approximately 1,000 MW of BESS facilities across 32 locations in the Philippines, we are now ushering in a new era for the Philippine energy industry through significant improvements in grid reliability and the integration of more renewable power sources to the country's diverse energy mix.

When will Fluence start deploying energy storage systems in the Philippines?

Fluence will continue deploying additional energy storage systems for SMCGPH's portfolio of projects across the Philippines through July of 2022, with additional systems targeted for commissioning and testing within early 2022.

How many Bess facilities are there in the Philippines?

We are operating BESS facilities at 32 locations in the Philippines, across the regions of Luzon, Visayas, and Mindanao. Overall, we are putting up approximately 1,000 MW of BESS facilities, which will help ensure the reliability of the grid, especially in areas that are in most need of power quality solutions.

Will the Philippines have a renewable power base by 2040?

The Philippine government is aiming to have an installed renewable power base of 20GW by 2040. SNAP, which was originally set up by another Nordic group SN Power that was later acquired by Scatec, operates 640MW of hydropower in the Philippines today.

Citicore Renewable Energy Corporation (CREC) pushes forward with the development of its Battery Energy Storage Systems (BESS) through a recently signed supply and services agreement with Sungrow Power Supply Co., Ltd. (Sungrow), the global leading PV inverter and energy storage system provider.
