What is Photovoltaic Glass?

Our photovoltaic glass offers a cutting-edge solution for both new construction and renovation projects. When integrated into ventilated facades, this glass enhances building aesthetics while providing key benefits such as radiation protection, thermal and acoustic insulation, and improved occupant comfort.

Why should you choose Onyx Solar integrated photovoltaics (BIPV)?

By integrating Onyx Solar's photovoltaic glass, buildings reduce energy costs, lower maintenance, and minimize environmental impact, all while maximizing the benefits of natural light. With more than 500 projects in 60 countries, Onyx Solar is the global leader in Building Integrated Photovoltaics BIPV.

Is Photovoltaic Glass a good investment?

Photovoltaic glass not only offsets conventional building material costs but also provides a tangible return on investment through energy generation. With an average payback time of 4 years and yearly ROIs of up to 20%, it stands as a sound economic choice.

Which Photovoltaic Glass has the highest power output per square meter?

Crystalline silicon photovoltaic glass excels with the highest power output per square meter. This technology stands out for its exceptional performance, making it ideal for high-demand applications. Amorphous silicon photovoltaic glass combines versatility with high performance.

Where is Vitro glass made?

Vitro operates seven glass production facilities across North America, four residential glass fabrication plants in Canada and one of the world's largest glass research and development facilities in Pittsburgh, Pennsylvania. For more information, please visit VitroGlazings.com.

What are the different types of Photovoltaic Glass Technologies?

To meet specific requirements, we offer two advanced photovoltaic (PV) glass technologies: amorphous silicon and crystalline silicon, both fully customizable. Crystalline silicon photovoltaic glass excels with the highest power output per square meter.
