

Romanian IOXUS super farad capacitor

What are Ioxus ultracapacitors?

IOXUS ultracapacitors, also known as supercapacitors or double layer capacitors, are optimized for the highest performance with the lowest resistance possible. Lightweight and designed to last, they will drastically increase the system peak power when combined with high energy sources to optimize your product.

What does a uc31 capacitor do?

Once the UC31 capacitor is charged, it will assist the low batteries to provide the power to crank the engine. The 12V Ioxus UltraCapacitor is designed to work with at least one 12V battery connected in parallel, and the unit needs at least 6V to be able to turn on. Often, when installing the UltraCapacitor, one or more batteries can be removed.

What is Ioxus UC-31 Ultracap?

Learn more The Ioxus UC-31 UltraCAP is a 12VDC Smart Power ultracapacitor based product for vehicles that improves starting reliability, improves vehicle voltage health, improves battery life, and improves sustainability. With a 15-year design life, you will never change your ultracapacitor again.

What makes Ioxus unique?

IOXUS, the only fully integrated ultracapacitor design and manufacturing facility in North America, maintains the highest standards and delivers the most flexible problem-solving methods for storing and delivering power.

What is a Titan ultracapacitor?

Our Titan ultracapacitors were designed specifically to handle harsh mechanical, electrical, and environmental conditions found in transportation markets. We use a proprietary electrode design to deliver the highest power density available.

What is Ioxus energy storage?

IOXUS energy storage solutions are designed and tested to stand up to the most extreme applications. IOXUS is the only fully integrated Ultra Capacitor Manufacturer in North America.

12V Super Capacitor Bank, Group 34 Max Power 4000W, 630 Farad. Weight Lbs. - 9.5 Weight Kgs. - 4.31. Length - 10.24 in Height - 7.20 in Width - 6.75 in.
