Abstract: This article presents a high gain pure sine- wave inverter based on the full-bridge dc-ac high-frequency link cycloconverter topology for telecom or general-purpose applications. The improved quasi-resonant modulation method allows reduction of ringing and turn-off losses of the dc-side switches. This is achieved with minimal energy circulation and ...

I am designing a SiC inverter for a Formula SAE student team, using a 72MHz STM32F302CC with the motor control library. The desired switching frequency is 50-100kHz, depending on the device we select. Reading the motor control manual, I discovered that "the FOC loop is... executed at the PWM frequency rate (That is: once every PWM Period)."
