Based on our recommendations, the best solar company in San Diego is Baker Electric Home Energy. With over 84 years of electrical contracting expertise, they have provided home energy solutions to over 16,500 customers in Southern California, known for their exemplary customer service and business ethics.

How much does San Diego solar cost?

the first time. Dirk and his company exceeded all of my expectations. The price was phenomenal, the installation was flawless, and the system operates better than expected. We used to pay between \$200-\$300 per month on electricity. Our bill is now anywhere from \$0-\$10. Thanks San Diego Solar.

Is a solar battery necessary in San Diego?

No, you don't need to install a solar battery in San Diego. Solar panels can operate and lower your electricity bill even without a battery. However, a solar battery might be a worthwhile investment in some cases, as it can provide backup power and peace of mind during prolonged grid blackouts or extreme weather events.

What is the San Diego solar equity program?

The San Diego Solar Equity Program (SDSEP) offers monetary assistance to income-qualifying, single-family homeowners in the City of San Diego to offset the cost of solar panel installation. Start by reading the California Solar Consumer Protection Guide.

What are the best Solar Lease companies in San Diego?

When considering solar leases in San Diego, two of the best companies to look into are SunPower and Sunrun. SunPower offers a guarantee on the energy output from the leased system, which is not always provided by other companies.
