

Sana Outdoor Power Supply

Do saunas need a 240 volt power supply?

The main reason most saunas require a 240 volt power supply is due to the size of the sauna heaters. Our sauna heaters come in a variety of sizes, ranging from 4.5 kilowatts to 29 kilowatts. Our smallest panel built saunas feature a traditional sauna heater that is capable of running off 120 volt power, with a 15 amp and 20 amp option available.

Where is the power supply located in an infrared sauna?

The power supply and control box are typically situated on the roof of the infrared sauna. The power cord can then travel from the roof down either side of the sauna room or along the rear wall panel to reach the power outlet.

Do outdoor saunas have electrical requirements?

Outdoor Sauna Electrical Requirements: Outdoor saunas may have specific electrical requirements due to their exposure to environmental elements. It is essential to install outdoor saunas with weatherproof electrical components and ensure proper insulation to prevent heat loss and energy inefficiency.

How much power does a sauna need?

The power requirements for your sauna depend on the type of sauna you will be installing inside or outside of your home, for instance, this one (on Amazon) won't require much power. Any time you need new electrical wiring installed, you should hire a qualified electrician - this includes wiring a new sauna.

What type of electrical connection does a sauna need?

The type of electrical connection your sauna requires depends largely on its size and type. Smaller saunas, such as portable, infrared models, or even a barrel sauna, may be able to run on a standard 120-volt, 15-amp electrical outlet.

Does a wood fired sauna stove need power?

Of course, there is no power needed for a wood fired sauna stove. However, if you'd like lighting inside your outdoor wood fired sauna, you will need standard 120 volt power to the building itself. The main types of saunas that only require a 120 volt power supply are infrared saunas.
