Can a single phase inverter output 240V 60Hz?

These single phase inverters can be programmed to output 240V 60Hzfor North American applications. Couple with an Autotransformer to do neutral forming for 120/240V split phase applications. We can also stack these inverters in three phase configurations to do 230V/400V WYE (50Hz or 60Hz).

What is a three phase inverter?

It is nothing but three single phase inverters put across the same DC source. The pole voltages in a three phase inverter are equal to the pole voltages in single phase half bridge inverter. The two types of inverters above have two modes of conduction - 180° mode of conduction and 120° mode of conduction.
