

South Sudan sells outdoor power

Why is solar energy important in South Sudan?

As characterised by ample sunshine with strong solar power potential, South Sudan remains as one of key destinations on African continent for solar energy investment. In addition to this, it has been documented that evolution of solar PV is of great significance in South Sudan.

How solar energy can transform South Sudan's economy?

A solar energy can also be transformative to South Sudan's economy. For example, solar energy is affordable, cleaner and last longer as compared to energy from diesel-powered generators because generators need diesel to burn and they also need to be replaced after few years.

How long does solar energy last in South Sudan?

Proponents of solar energy argue that a solar system can produce reliable electricity for about 25 years. Having recognised solar energy potential, South Sudan is expected to put more emphasis on development of solar energy sector as part of its fight against energy poverty and economic diversification.

Why is electricity important in South Sudan?

The South Sudanese government and high political leadership prioritize electricity for its importance. They are mainly focused on increasing generation capacity through hydropower development, while other energy sources such as solar and wind are sometimes considered too expensive and difficult.

Will South Sudan build a 12 MWp solar plant in Juba?

Kampala-based developer Aptech Africa says it plans to build a 12 MWp solar plant in Juba. The capital of South Sudan is set to host a new 12 MWp grid-connected solar plant.

What makes up the power sector in South Sudan?

The power sector in South Sudan consists of a mix of public and private sector service providers that engage in electricity generation, transmission, and distribution enterprises. Encouragement is given for the development of electricity through renewable power sources, such as hydro, wind, biomass, solar, and geothermal.
