

St Johns Energy Storage Equipment

Why does Saint John energy use a battery system?

It also helps store extra electricity when the demand is low and helps address peak energy demands during the coldest winter months. The battery system may also help Saint John Energy provide power to customers during power outages due to storm events.

Why did Saint John energy add a battery storage site at Burchill?

Saint John Energy decided to add a battery storage site at Burchill partly due to the success the company has seen with their first Megapack project. Installed in 2020, the company was expecting to see large savings, and the Megapacks delivered just that, with Saint John Energy saving over \$109,000 in the first year of operation.

How can I find a storage unit in St. Johns?

To find a storage unit in St. Johns, enter your ZIP code into EZstorit.ca. You'll be presented with a list and a map of self-storage units in your area. Whether you need a storage unit for personal reasons or business use, you'll have a number of options to choose from.

Where will Tesla megapacks be installed in Saint John?

Saint John Energy is embarking on a second battery energy storage project with Tesla Megapacks, this time at a new wind farm project near the city of Saint John. The Megapacks will be installed at the Burchill Wind Farm, located about 15km southwest of Saint John.

Why does Canada support green energy projects in Saint John?

The Government of Canada is pleased to support this important initiative in Saint John, co-led by the Neqotkuk First Nation. "One of our traditional values as a nation is to take care of the environment. Green energy projects are going to start taking over, and they're going to dominate, and that's the way of the future."

Where will the megapacks be installed in Saint John?

The Megapacks will be installed at the Burchill Wind Farm, located about 15km southwest of Saint John. The project was officially commissioned in June 2023 and features 10 turbines providing 42 megawatts (MW) of power, enough to supply 15% of the city's energy needs.
