

Strong start with outdoor power supply

What are the best portable power stations?

To help you decide, I tested the efficiency, in a variety of scenarios, of the best portable power stations from Jackery, Oupes, EcoFlow, Anker, Goal Zero, Greccell, Bluetti, Dakota Lithium, Lion Energy, Vtoman, and Ugreen. [What to Know Before Purchasing a Portable Power Station](#)

What spec should you consider when buying a power station?

Whatever the reason you are purchasing a power station, the most important spec to pay attention to is watt hours, which is a measurement of how much energy the power station can hold. While a particular power station might claim to hold 1,000 watt hours, the actual amount of usable power you can get out of it is a different story.

Can you use all USB ports on a power station?

In my experience, it's very rare that you will use all the available USB or AC ports, as these power stations are really only designed to power one large appliance (like a refrigerator) or a handful of smaller devices like a phone or a laptop.

How much power can a portable power station hold?

While a particular power station might claim to hold 1,000 watt hours, the actual amount of usable power you can get out of it is a different story. The best portable power stations also have an onboard computer that shows you how much energy is left in your unit, as well as how much power it's currently using.

Is the greccell T1000 a good power station?

The Greccell T1000 had, without question, one of the best performances of any portable power stations that I looked at. For the low-draw test, it managed an impressive 77 percent of its stated watt hours, one of the best results of any power station I've ever tested. The high-draw test was a similar story, at 87 percent.

Does your power station need water or dust?

Most people don't need to worry about water or dust -- after all, your power station likely lives inside your home, garage, or van, perhaps making an appearance on a shady picnic table while you get some work done on an especially nice day.

Outdoor UPS systems are rugged back-up power supplies that are designed to support Access Control, Security, Public Utility and Telecommunications applications, most of which are in harsh outdoor locations. ...
