Condensadora VRF Carrier - X-Power Full DC Inverter Super S Series. Modo Enfriado por Aire Heat Pump Capacidad 6 - 12.5 ton Voltaje 440-3-60. Folleto Comercial. Descripci&#243;n: En la Condensadora VRF Carrier todos los compresores de alta descarga con inversor de CC contribuyen en gran medida a un IPLV m&#225;s alto. El IPLV m&#225;s alto es de hasta 5,8.

The DC inverter compressor reaches full capacity rapidly, providing quicker cooling or heating with lower levels of temperature fluctuation during the cooling/heating operation.

Continually inhale the fresh air to improve the quality of the indoor air, fulfills air quality more healthy and comfortable. A ventilation motor (provided by the installer) can be installed inside the fresh air duct to improve the fresh air volume.

The operating sequence of the individual compressors is rotated, balancing their operating hours and distributing load evenly. Inverters reduce the risk of compressor failure and eliminate on/off power surges. Flexibility: Carrier &#174; now has the most diverse selection of VRF products on the market. Smaller equipment footprints matched with ...
