Modular energy storage offers specific benefits for emergency response and off-grid applications: Emergency Response. Hospitals, shelters, and other emergency facilities cannot tolerate power outages. Modular storage acts as an uninterruptible power supply to keep critical loads online.

The power source for emergency illumination must be available and supply power to the luminaire within 10 seconds after the loss of normal power supply. For certain building and occupancy types, the emergency power source must be located within spaces fully protected by approved fire suppression systems or within a two-hour fire-rated room.

The system includes a lithium battery energy storage system, energy storage converter, air conditioner, fire protection, and vehicle-mounted box. The energy storage vehicle has a configuration capacity of 576kWh and an output power of 250KW, which can meet the power supply requirement of a 250kW load for 2 hours.
