

# Tunisian outdoor power supply processing enterprise

Who produces electricity in Tunisia?

State power utility company STEG controls 92.1% of the country's installed power production capacity and produces 83.5% of the electricity. The remainder is imported from Algeria and Libya as well as produced by Tunisia's only independent power producer (IPP) Carthage Power Company(CPC), a 471-MW combined-cycle power plant.

What is the power sector in Tunisia?

Includes a market overview and trade data. Tunisia's power sector is well developed, and nearly the entire population enjoys access to the national electricity grid. Tunisia has a current power production capacity of 5,547 megawatts (MW) installed in 25 power plants, which produced 19,252 gigawatt hours in 2018.

What is the power production capacity of Tunisia?

Tunisia has a current power production capacity of 5,547 megawatts (MW) installed in 25 power plants, which produced 19,252 gigawatt hours in 2018. State power utility company STEG controls 91.5% of the country's installed power production capacity and produces 81% of the electricity.

Where does Tunisia's power come from?

The remainder is imported from Algeria and Libya as well as produced by Tunisia's only independent power producer (IPP) Carthage Power Company(CPC), a 471-MW combined-cycle power plant. The CPC plant was officially handed over to STEG in May 2022 ending a 20-year power purchasing agreement between both companies.

What challenges does the Tunisian energy sector face?

The Tunisian energy sector is facing strategic, economical, social and environmental challenges. Energy sourcing, particularly in the power sector, relies heavily on natural gas (97% of total power generation), of which 50% is imported from neighboring Algeria, given the limited available national resources.

How much of Tunisia's electricity is generated from renewables?

Only 3% of Tunisia's electricity is generated from renewables, including hydroelectric, solar, and wind energy. While STEG continues to resist private investment in the sector, Parliament's 2015 energy law encourages IPPs in the area of renewable energy technologies.
