

What types of uninterruptible power supplies do you supply?

We supply a full range of uninterruptible power supplies including: Offline, Line Interactive, Online Double Conversion and Power Conditioned UPS. From a small 300va to a 800Kva UPS running in parallel we have the expertise to provide the solution you require. The design, supply, installation and maintenance of your UPS system is our speciality.

How do uninterruptible power supplies work?

Uninterruptible power supplies are essentially a battery backup for your computers and critical services. They connect to your mains supply and have internal battery packs that provide storage during a power outage.

What is an uninterruptible power supply (UPS)?

An uninterruptible power supply or UPS protects hardware such as computers, data centres, telecommunication equipment or other electrical equipment, where an unexpected power disturbance could cause serious business disruption or data loss.

What is critical power supplies?

At Critical Power Supplies, Uninterruptible Power Supplies (UPS) are our speciality. With over 30 years of experience, we offer a comprehensive range of UPS systems tailored to meet the demands of various business environments, from small offices to large industrial operations.

What is a standby UPS system?

Standby UPS systems are a crucial component of hospital and medical power systems too. Having both a UPS system and a standby generator makes for a truly robust and reliable backup power setup.

Do I need a UPS system & a standby generator?

Having both a UPS system and a standby generator makes for a truly robust and reliable backup power setup. A diesel generator is an essential component of many business power plans, but having a UPS system in place bridges the gap between the moment of outage and the time it takes for the generator to kick start.
