Are double glass solar panels bifacial?

There are frameless, double glass solar panels, exposing the rear of cells, but not bifacial. True bifacial panels have contacts/busbars both on the front and back of the cells. Double glass solar panels with advanced PERC technology, half-cell and frameless design enable lower degradation, high power and longer life.

Why did Coulee develop double-glass solar panels?

In order to meet the demand, Coulee has successfully completed the development of double-glass solar panels and started mass production of these photovoltaic glass panels in early August 2018.

What are dual glass solar panels?

Dual glass solar panels are somewhat a new type of building material (BIPV), providing clean and sustainable energy without any additional investment. They are great for building parking lots, greenhouses, shopping malls, etc. Their design is compatible with the most conventional glazing systems for facades and skylights.
