KPV plans and develops large Photovoltaic and Solar Thermal power plant projects for investors.

Which glass-glass modules are installed at Matzleinsdorfer Platz in Vienna?

The newly built canopy at Matzleinsdorfer Platz in Vienna is equipped with building-integrated glass-glass modules made by the German manufacturer SUNOVATION.

How curved glass is a photovoltaic module made?

This construction method is made possible by the special production process SCET (SUNOVATION Cell Embedding Technology). Here, the module composite is produced by means of a cold filling process, which enables stress-free embedding of the photovoltaic cells in curved glass.

What are solar glass modules used for?

The facade of the central entrance area as well as the atrium were equipped with translucent, individually adapted solar glass modules. The individually manufactured glass-glass modules are integrated into the building envelope and serve as roofing, shading and energy supplier.

Selective Absorption of UV and Infrared by Transparent PV window (image courtesy of Ubiquitous Energy)
Let's Be Clear About This. Many manufacturers refer to this genre as transparent photovoltaic glass, but we see no reason for the glass to be limited to only transmitting visible wavelengths (approx. 380 nm to 750 nm)..

Finally decided to turn our covered deck into a sunroom. We couldn't be happier and our usage of the space has gone from occasionally using the covered deck when it was the perfect temperature and not too windy, and the bugs weren't too bad, to now being the most used room in our house. This may be the best money we've ever spent!
